

since 1974  
**ELVACO AD**

Poslovni objekat ELVACO, Bijeljina

since 1974

**ELVACO AD**

## **KEY FACTS**

- Founded in 1974.
- Metal-processing company with eminent production of several technological lines.
- 4 production plans, on 140,000 m<sup>2</sup>.
- 200 qualified employees.
- Existing capacity, human resources, vast experience and modern management enable successful responding to market demands.

since 1974

**ELVACO AD**

## **PRODUCTION LINES**

1. Welded meshes and coated fence systems
2. Finished lift guide rails
3. Welding materials - electrodes
4. Production of process equipment

# 1. PRODUCTION OF WELDED MESHES AND COATED FENCE SYSTEMS

## PRODUCTS:

- Longitudinal, lateral and mutually supporting meshes,
- Lattice girders

Annual capacity: 30,000 t

mesh

Lattice girder - BINOR

Straightened and cut wire

# 1. PRODUCTION OF WELDED MESHES AND COATED FENCE SYSTEMS

Plastic-enclosed system

Annual capacity of 2,000 t

Usage: fencing industrial buildings, shops, oil stations, household.

Wire hot galvanization provide long-lasting protection against corrosion.

*Coated fence panels*

*Coated fence panels*

## 2. PRODUCTION OF FINISHED LIFT GUIDE RAILS

Possible annual  
production 9,500 t

*Finished lift guide rails*

Production of cold-  
drawn rail guides is  
based on the  
technology of  
the Italian company  
**MONTEFERRO**

*Finished lift guide rails*

# 3. PRODUCTION OF WELDING MATERIALS - ELECTRODES

Types of electrodes:

- classical
- special welding electrodes

Possible annual production  
14,000 t

ELVACO AD has its own  
laboratory for issuing  
certificates.

*Classical and special welding  
electrodes*

## 4. PRODUCTION OF PROCESS EQUIPMENT

Designing, manufacturing, and installing process equipment for the transport, cleaning and storage of grains and oilseeds

*Silos for grain storage*

## 4. PRODUCTION OF PROCESS EQUIPMENT

### RANGE OF PRODUCTS:

- Horizontal chain conveyors, belt conveyors,
- Bucket elevators vertical, screw conveyors,
- Hydraulic unloading platform for road and rail vehicles, aspirators for cleaning fine and coarse grains and oilseeds,
- Centrifugal fans,
- Cyclone filter aspiration.

Equipment capacity 5-200 t/h

*Transporters*

*Belt conveyors*

## 4. PRODUCTION OF PROCESS EQUIPMENT

### **MOST COMMON CONSTRUCTION OF FACILITIES:**

- Silos for storing grains and oilseeds,
- Floor storage,
- Trans-shipment centers,
- Mills, feed mills,
- Seed processing centers,
- Breweries, factories,
- Oil, lime, cement and wood processing plants,
- Pumping stations of liquid fuels,
- Separation of gravel.

***Transporters***

***Belt conveyors***

## 4. PRODUCTION OF PROCESS EQUIPMENT

### TYPES OF MOBILE STORAGE TANKS OF LIQUID FUEL:

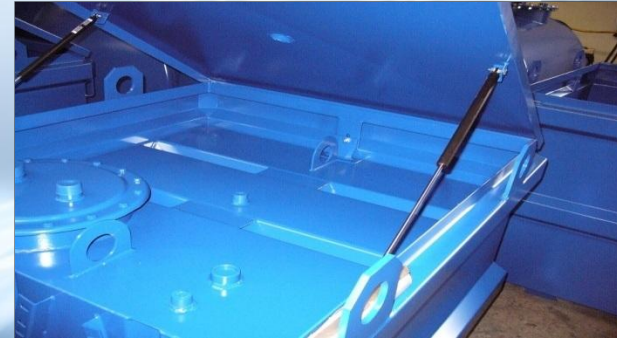

- IBC,
- Prism, and
- Cylindrical tanks

Capacity 300-5,000 liters

Possible annual production 2400 units

*Cylindrical tanks*

*IBC and prisma tanks*

## 4. PRODUCTION OF PROCESS EQUIPMENT

Production of high  
quality and fully  
environmental  
mobile oil stations  
(PNP)

Capacity of stations  
1000 -25,000 liters

***PNP (mobile oil pump)***

***PNP (mobile oil pump)***

## 4. PRODUCTION OF PROCESS EQUIPMENT

### PRODUCTION OF:

- Roll containers for the solid waste storage with capacity 10-30 m<sup>3</sup>,
- Car eaves for one and more cars and mobile kerosene pumps.

*Car eaves*

*Mobile kerosene pumps*

*Roll containers for the waste storage*

since 1974

# ELVACO AD

- ISO 9001:2008 quality management system
- ISO 14001 certification for environmental management
- ISO 18001 certification for instructions for systems management
